# A powerful and scalable architecture, to support your growth

A solution designed to boost your performance and support your growth Sage Intacct is a cloud-based financial management platform that offers comprehensive accounting features to serve multiple business sectors and:

- reduces closing times by up to 79%;

- allows you to view real-time reports on hundreds of consolidated entities;

- puts finance directors in the ideal position to drive the company's growth.
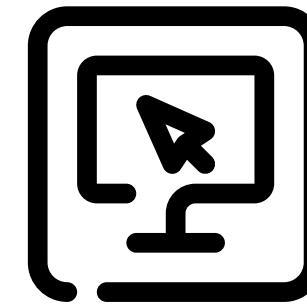

Innovative features for today and for tomorrow Fully cloud-hosted modular, Sage Intacct is a scalable solution that allows you to add functional modules as your development progresses.

With four major releases per year and an average of 50 new features per release for our customers, innovation is in our DNA. In fact, industry analysts readily describe Sage Intacct as "visionary" and a "leader".
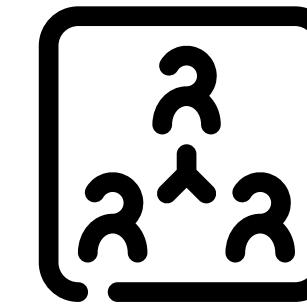

The flexibility and accessibility of a 100% cloud-based solution
Ensure your company's agility with an open and configurable solution that offers easy data sharing and multiple solution integration possibilities.

Sage Intacct handles 100 million application requests per day, 1 billion API requests per month, and more than 50 billion financial statements.

"The customers"
Sage Intacct make a comeback on investment average of 250% and cushion their solution in less than 6 months.

Sage

Our solution

An overview of Sage Intacct

Designed for finance, by finance
As a leading financial management solution, Sage Intacct offers an open and interconnected platform via APIs, facilitating integration and communication with a wide range of related solutions. This allows Sage Intacct to perfectly adapt to your business requirements and industry.

Key features of Sage Intacct

Data financial

Billing

Features advances
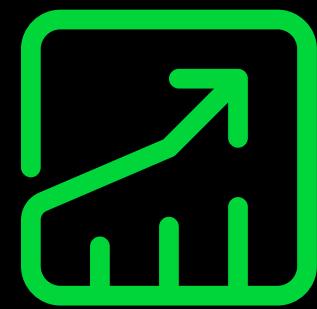

Paintings edge and reports
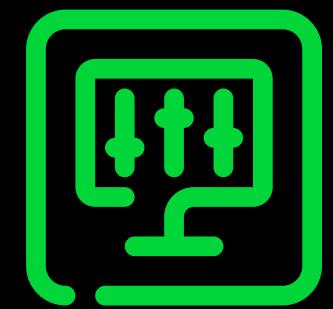

Platform services
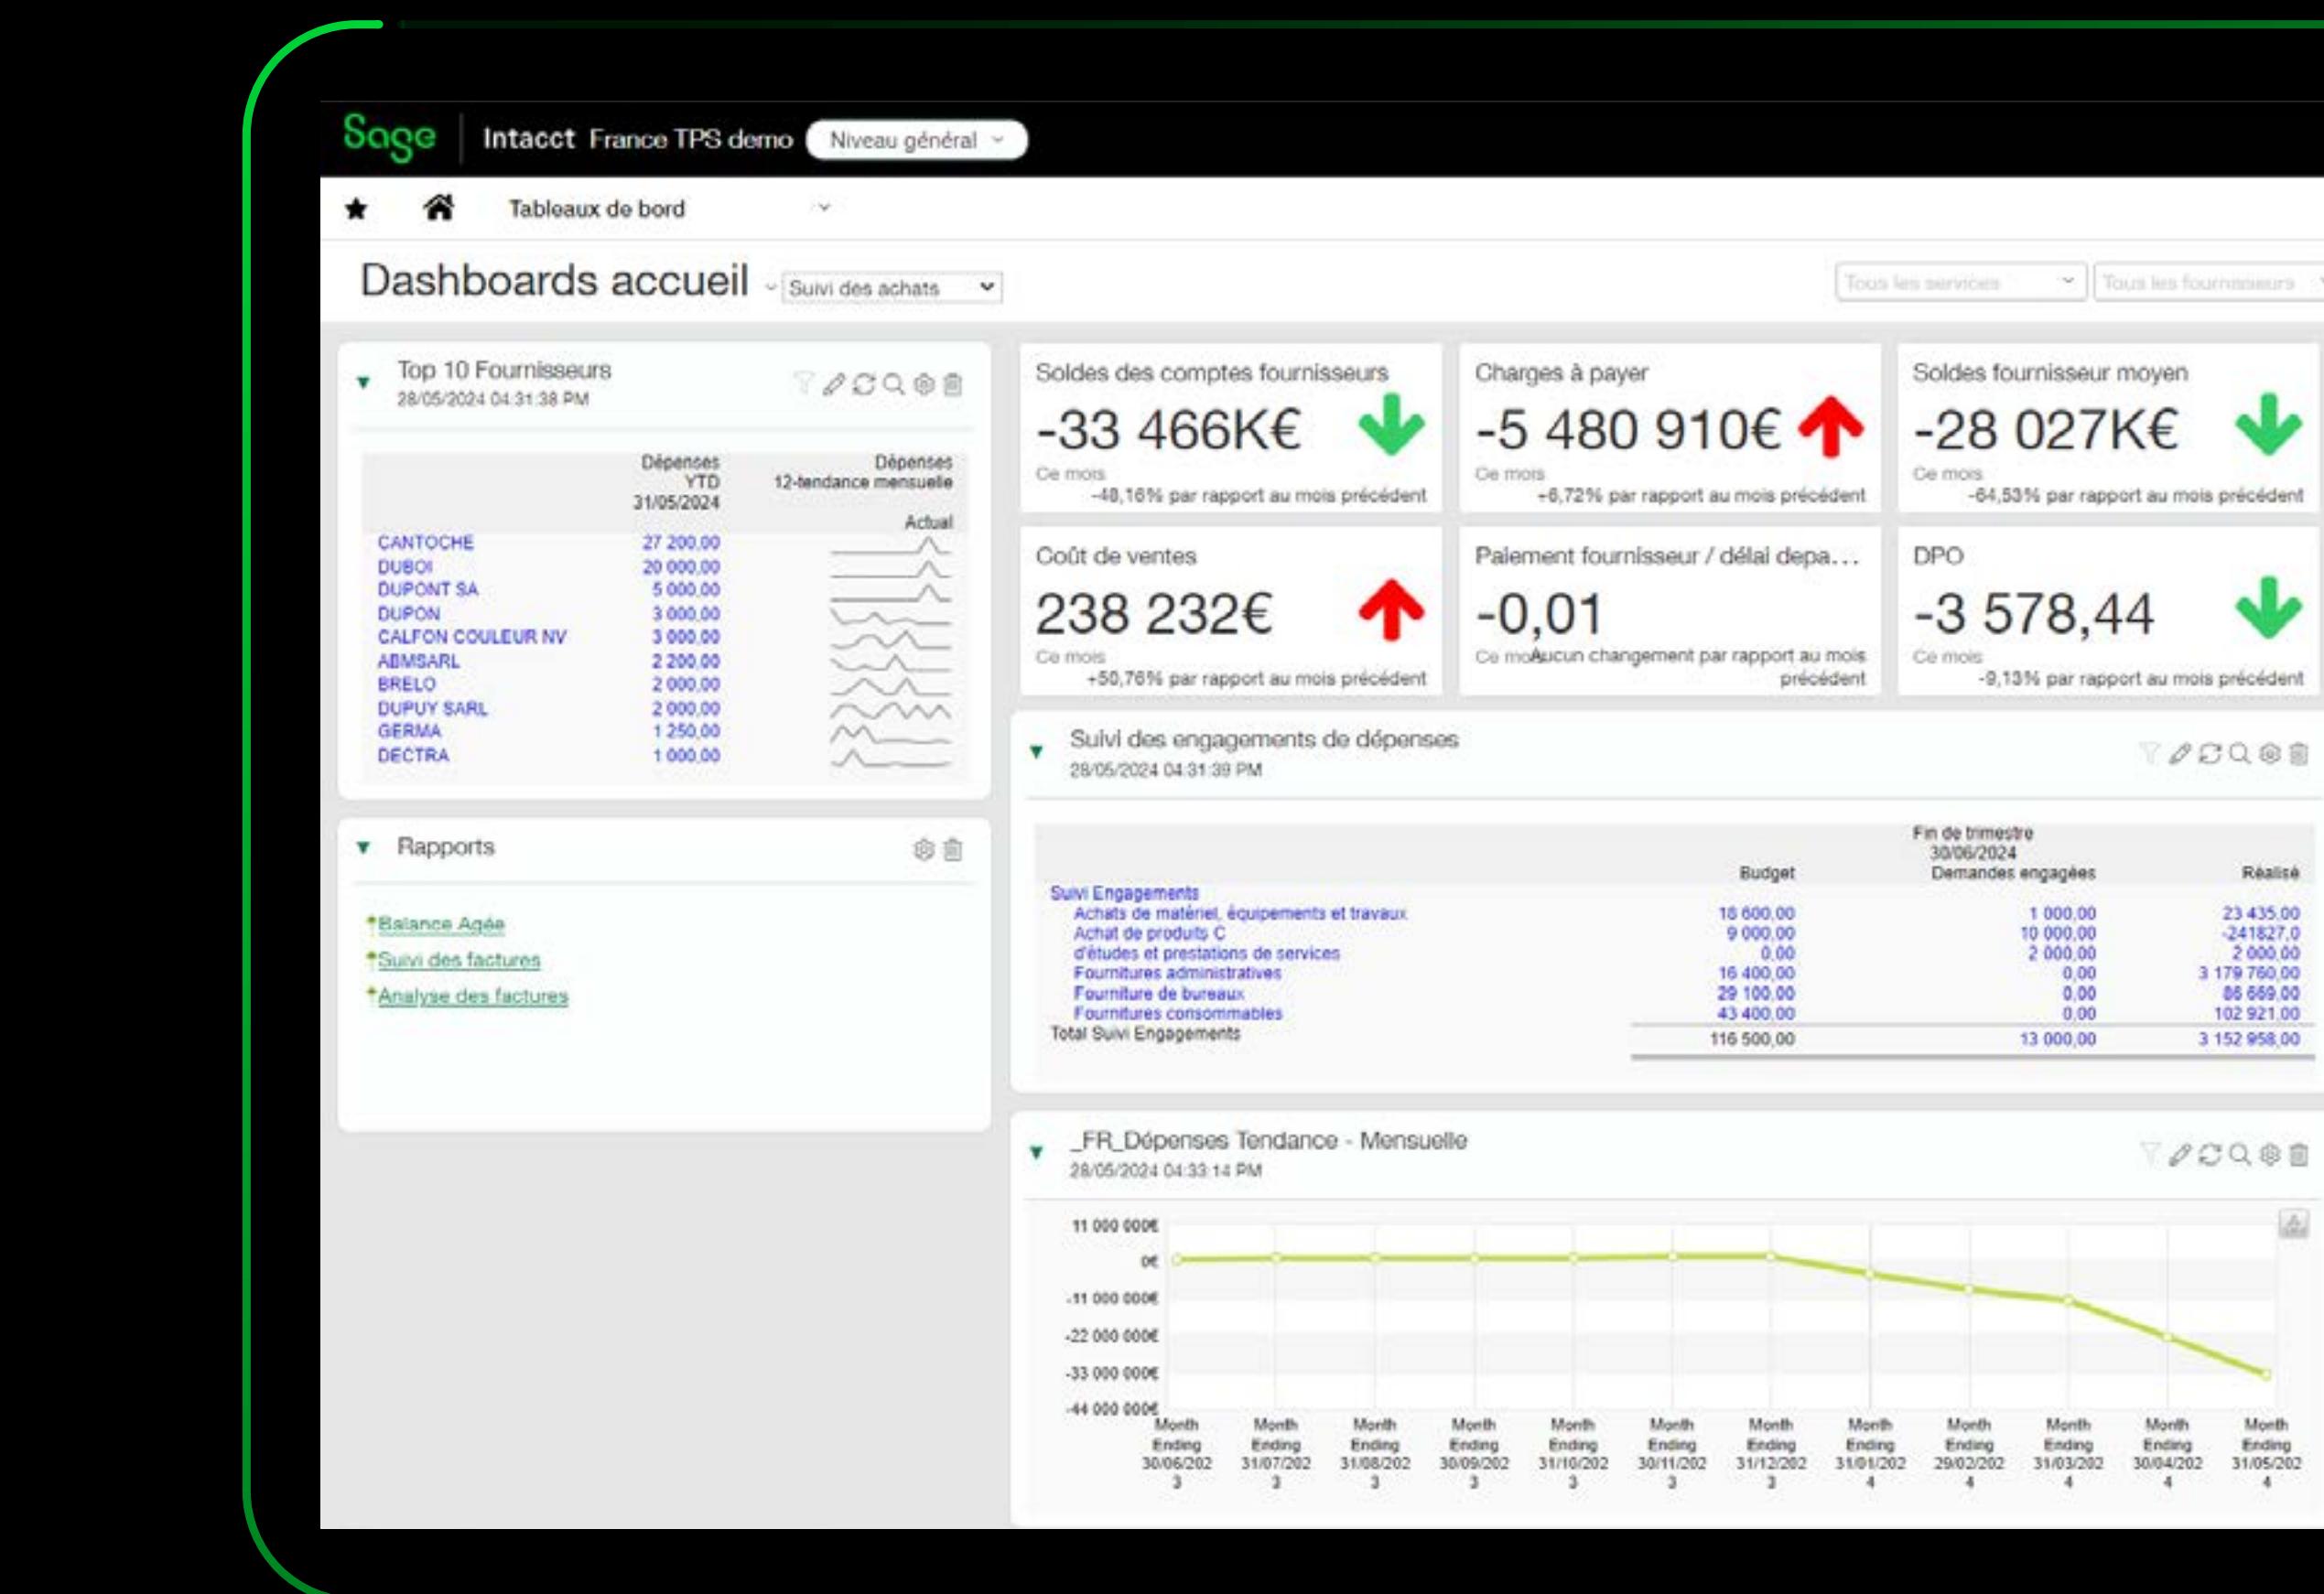

Financial management

with complete confidence

Automate complex processes and multidimensional data analysis

Reduce your closing times by more than 50% and boost your finance team's productivity. With Sage Intacct accounts payable software, your business saves time by automating manual processes and eliminating inefficient workflows. Simply point and click to configure the approval processes that best suit your organization.

Accounts payable
Streamline processes quickly and efficiently throughout the workflow.

Customer accounts
Automate the invoicing and collection process, optimize your cash management and reduce your outstanding customer balances.

Cash management
Monitor multiple accounts at once with real-time display and easy reconciliation.

Ledger
Consolidate data from multiple entities in just minutes, regardless of currency or geographic area.

Order management
Automate your order processes, even the most complex ones, from quote to payment, and boost your profitability.

Purchases
Structure your transactions and approvals for greater fluidity, accuracy, and visibility.
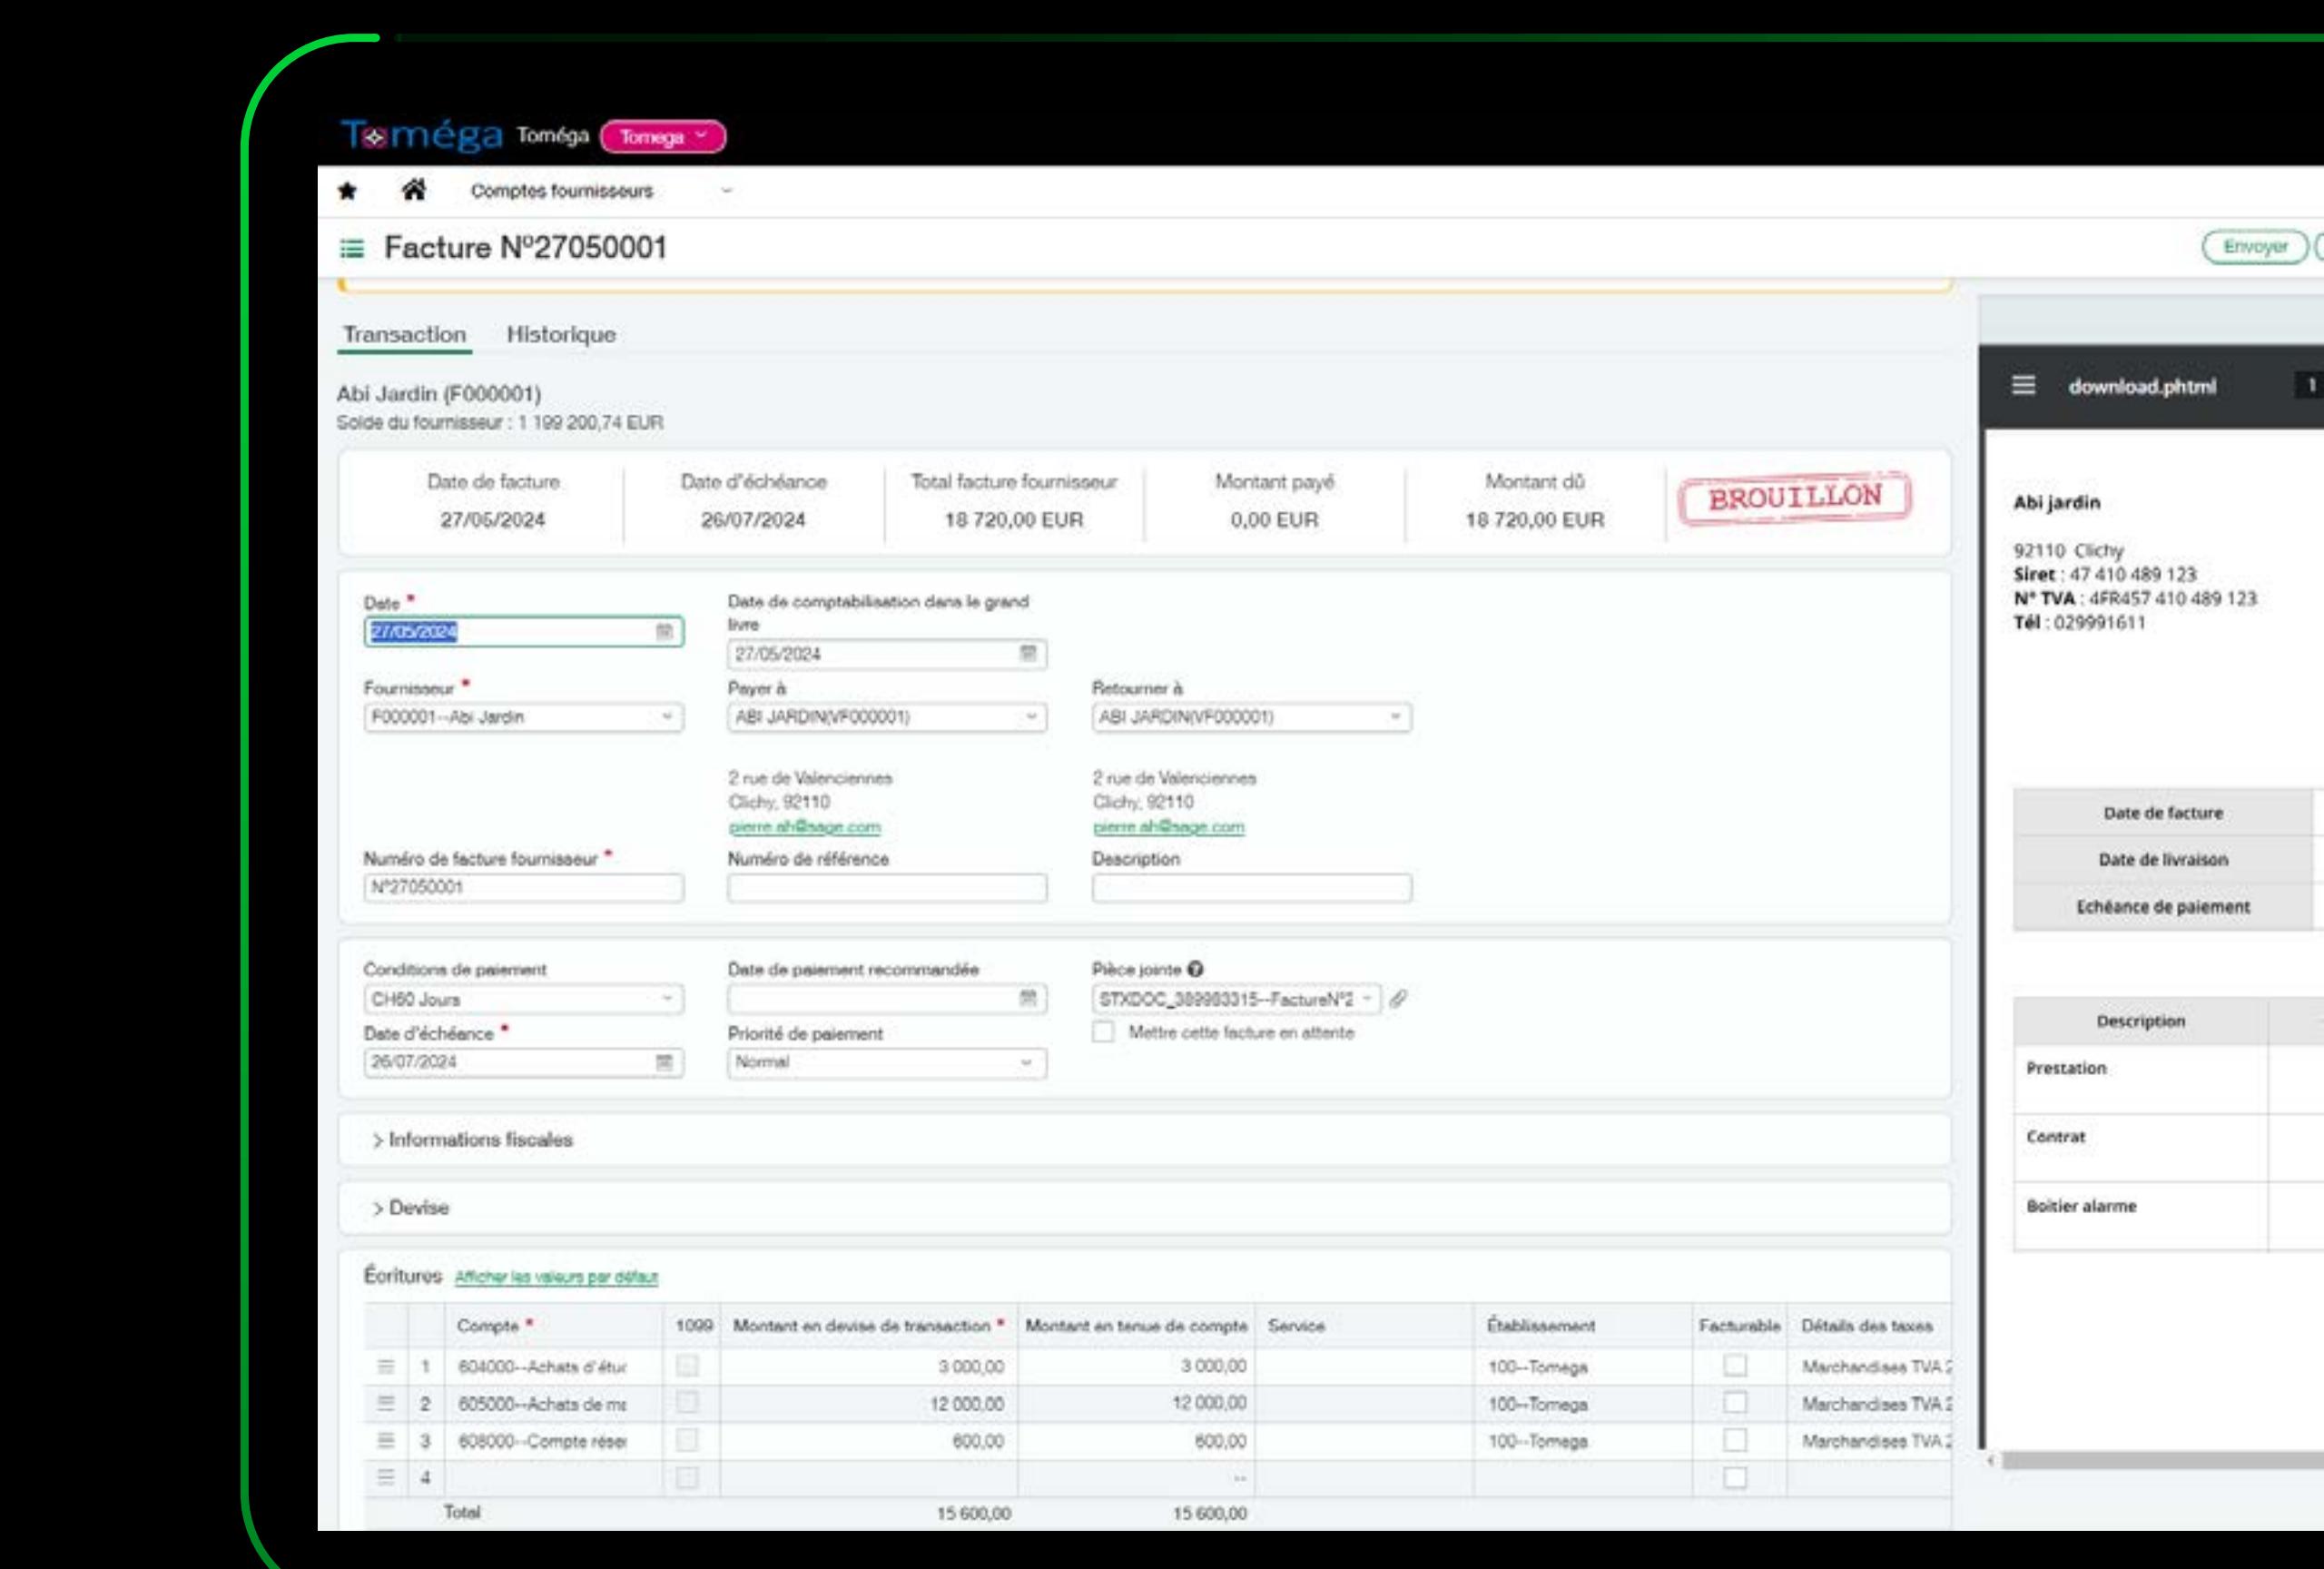

Dashboards and reports

Intuitive dashboards offering a quick and detailed overview of financial and operational performance

Save over 40 hours per month on your financial reports and reduce by 75% of data verification time. Sage Intacct financial reports offer the agility and flexibility needed to quickly detail and distribute critical data to all key stakeholders: investors, executives, sales, finance, and others. The cutting-edge performance of our solutions enables you to get fast answers for confident decision-making.

Understand through data The innovative general ledger includes eight dimensions that provide a better understanding of the business context of transactions and facilitate budget tracking. You can quickly view or create reports that analyze

real-time company performance based on operational factors, without having to manage a complex accounting plan.

Detailed financial reports Sage Intacct offers virtually unlimited options for creating financial reports and performing analysis. Compare operational statistics with financial metrics, and review summary data.

For multiple entities, at any time, and with granular transaction analysis down to the source. You can also flag trends and spot exceptions using powerful report visualization features.
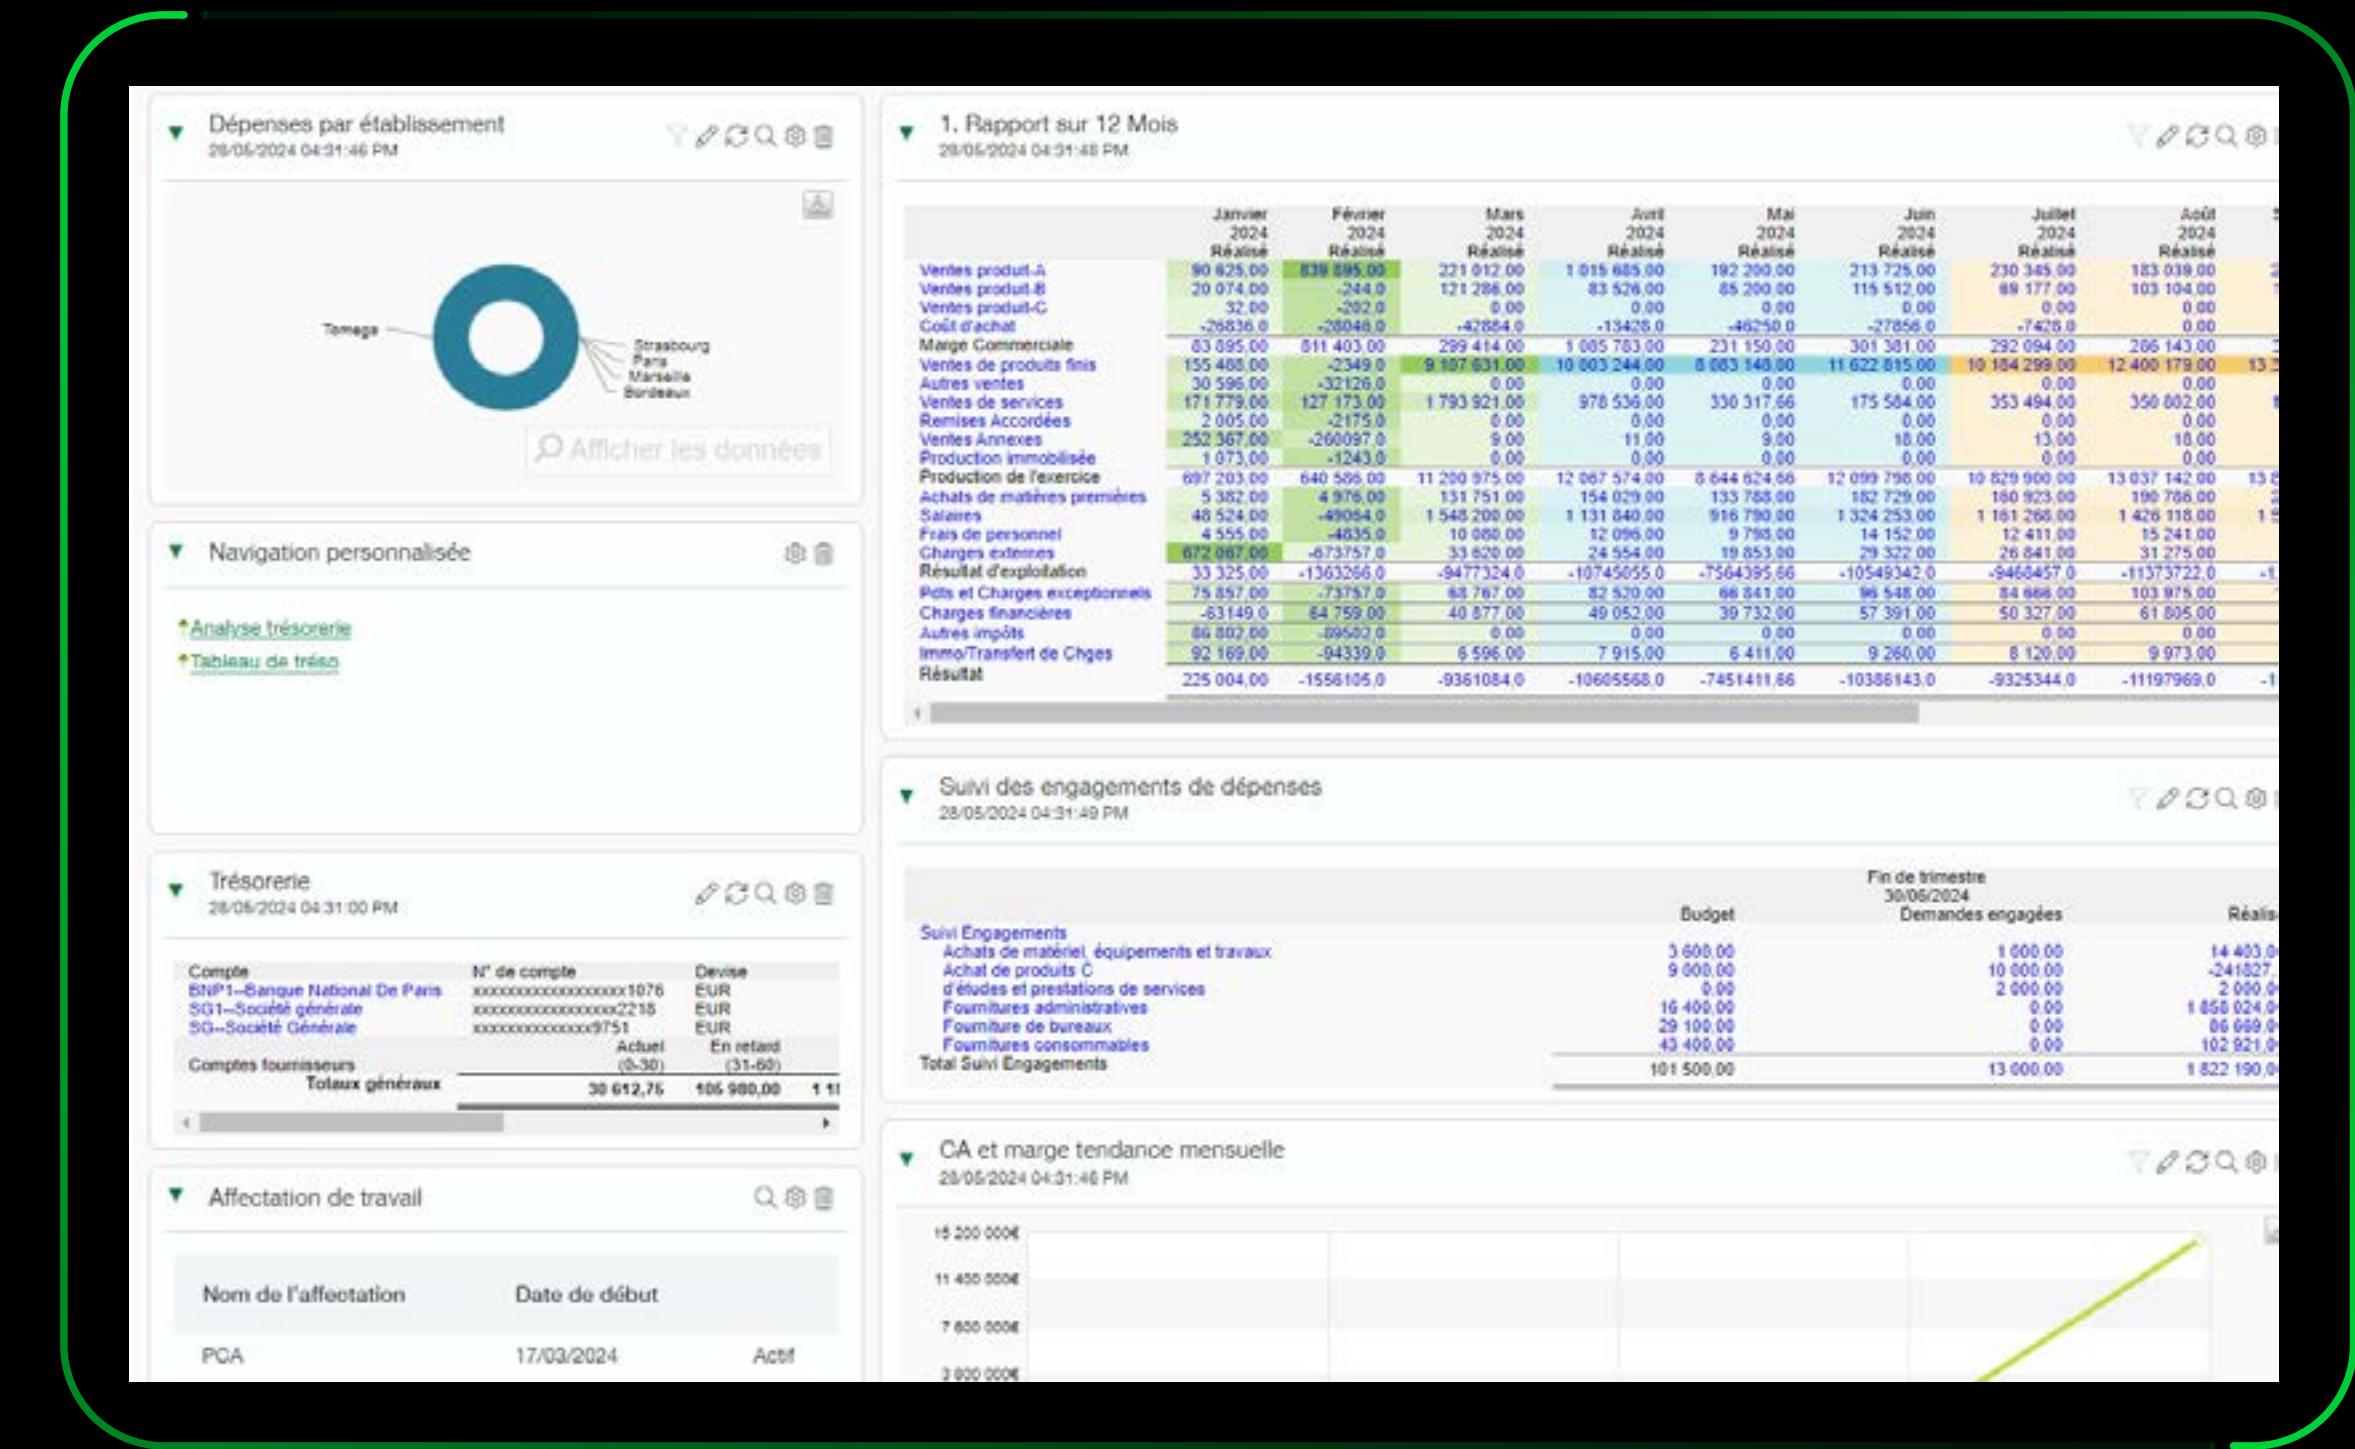

Greater agility for your business By bringing all your financial and operational data together in one place, Sage Intacct's multidimensional visibility allows you to significantly reduce the time spent verifying the accuracy of your financial data. This enables you to make high-impact strategic decisions.

Go even further in your analysis Sage Intacct's interactive custom report creation wizard lets you easily create real-time reports that meet your most demanding needs. Get the information you need in seconds to solve complex problems and adapt to changing markets.

Billing

Automate complex revenue management and invoicing processes with intelligent solutions.

Whether it's managing subscriptions, specialized contracts, recurring billing services, or tackling the added complexity of compliance obligations, financial services companies rely on the Sage Intacct cloud solution, which intelligently, automatically, and more quickly simplifies revenue management. We offer automated workflows, intelligent revenue recognition, and transparent data flows that streamline the revenue cycle across your entire organization.

**Billing for contracts and subscriptions**
Streamline order-to-cash workflows quickly and efficiently.

Cost calculation and project invoicing
Optimize your purchasing processes and reduce your invoicing times to limit revenue losses.

Income recognition*
Reduce the complexity associated with revenue accounting and refine your expense amortization management.
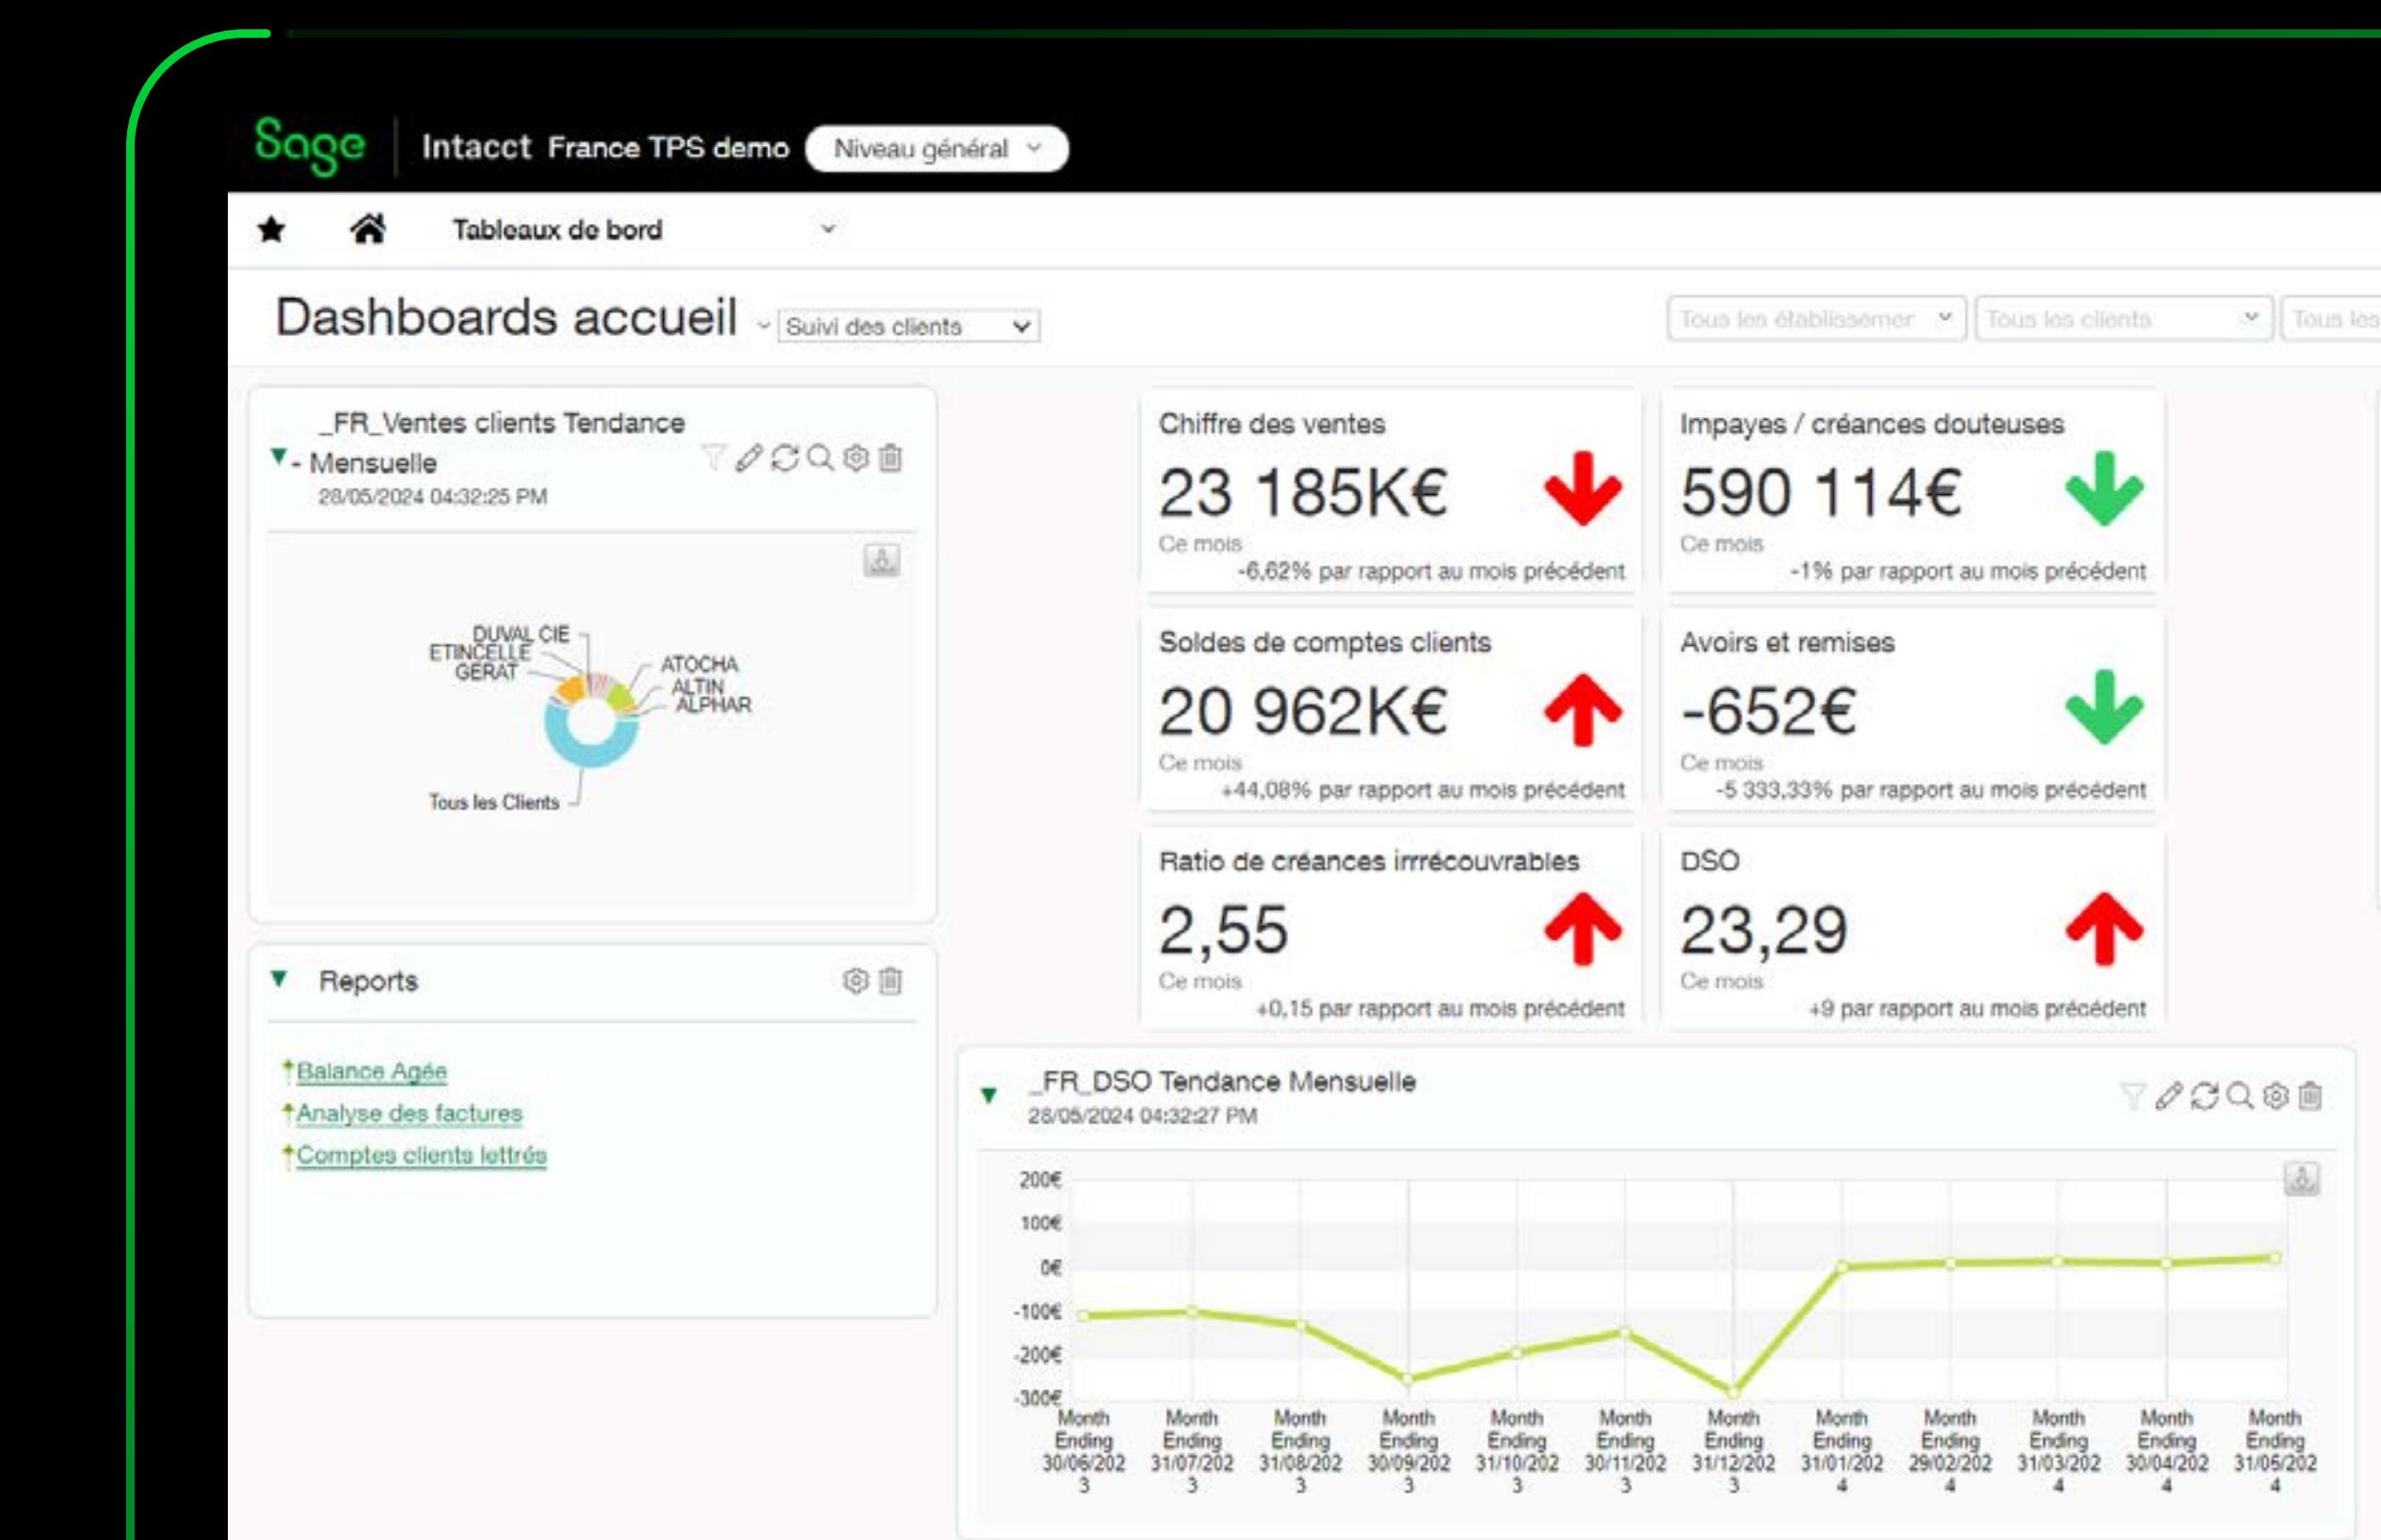

Platform services

Integrated tools that promote the growth of your business

The architecture of our solution gives you a competitive advantage. Reduced costs, increased productivity, faster decision-making: Sage Intacct allows you to turn user expectations into reality.

Service platform
Create solutions perfectly tailored to each of your business needs.

Web services API
Easy integration with other cutting-edge solutions.

Integration with Salesforce
Connect financial and commercial services and optimize growth and revenue.

Sage Network, the first inter-company network
Sage Network is a digital platform that automates and simplifies the flow of data between companies (customers, suppliers) and with their environment (bank, accountant, administration, etc.) and facilitates the implementation of electronic invoicing obligations.
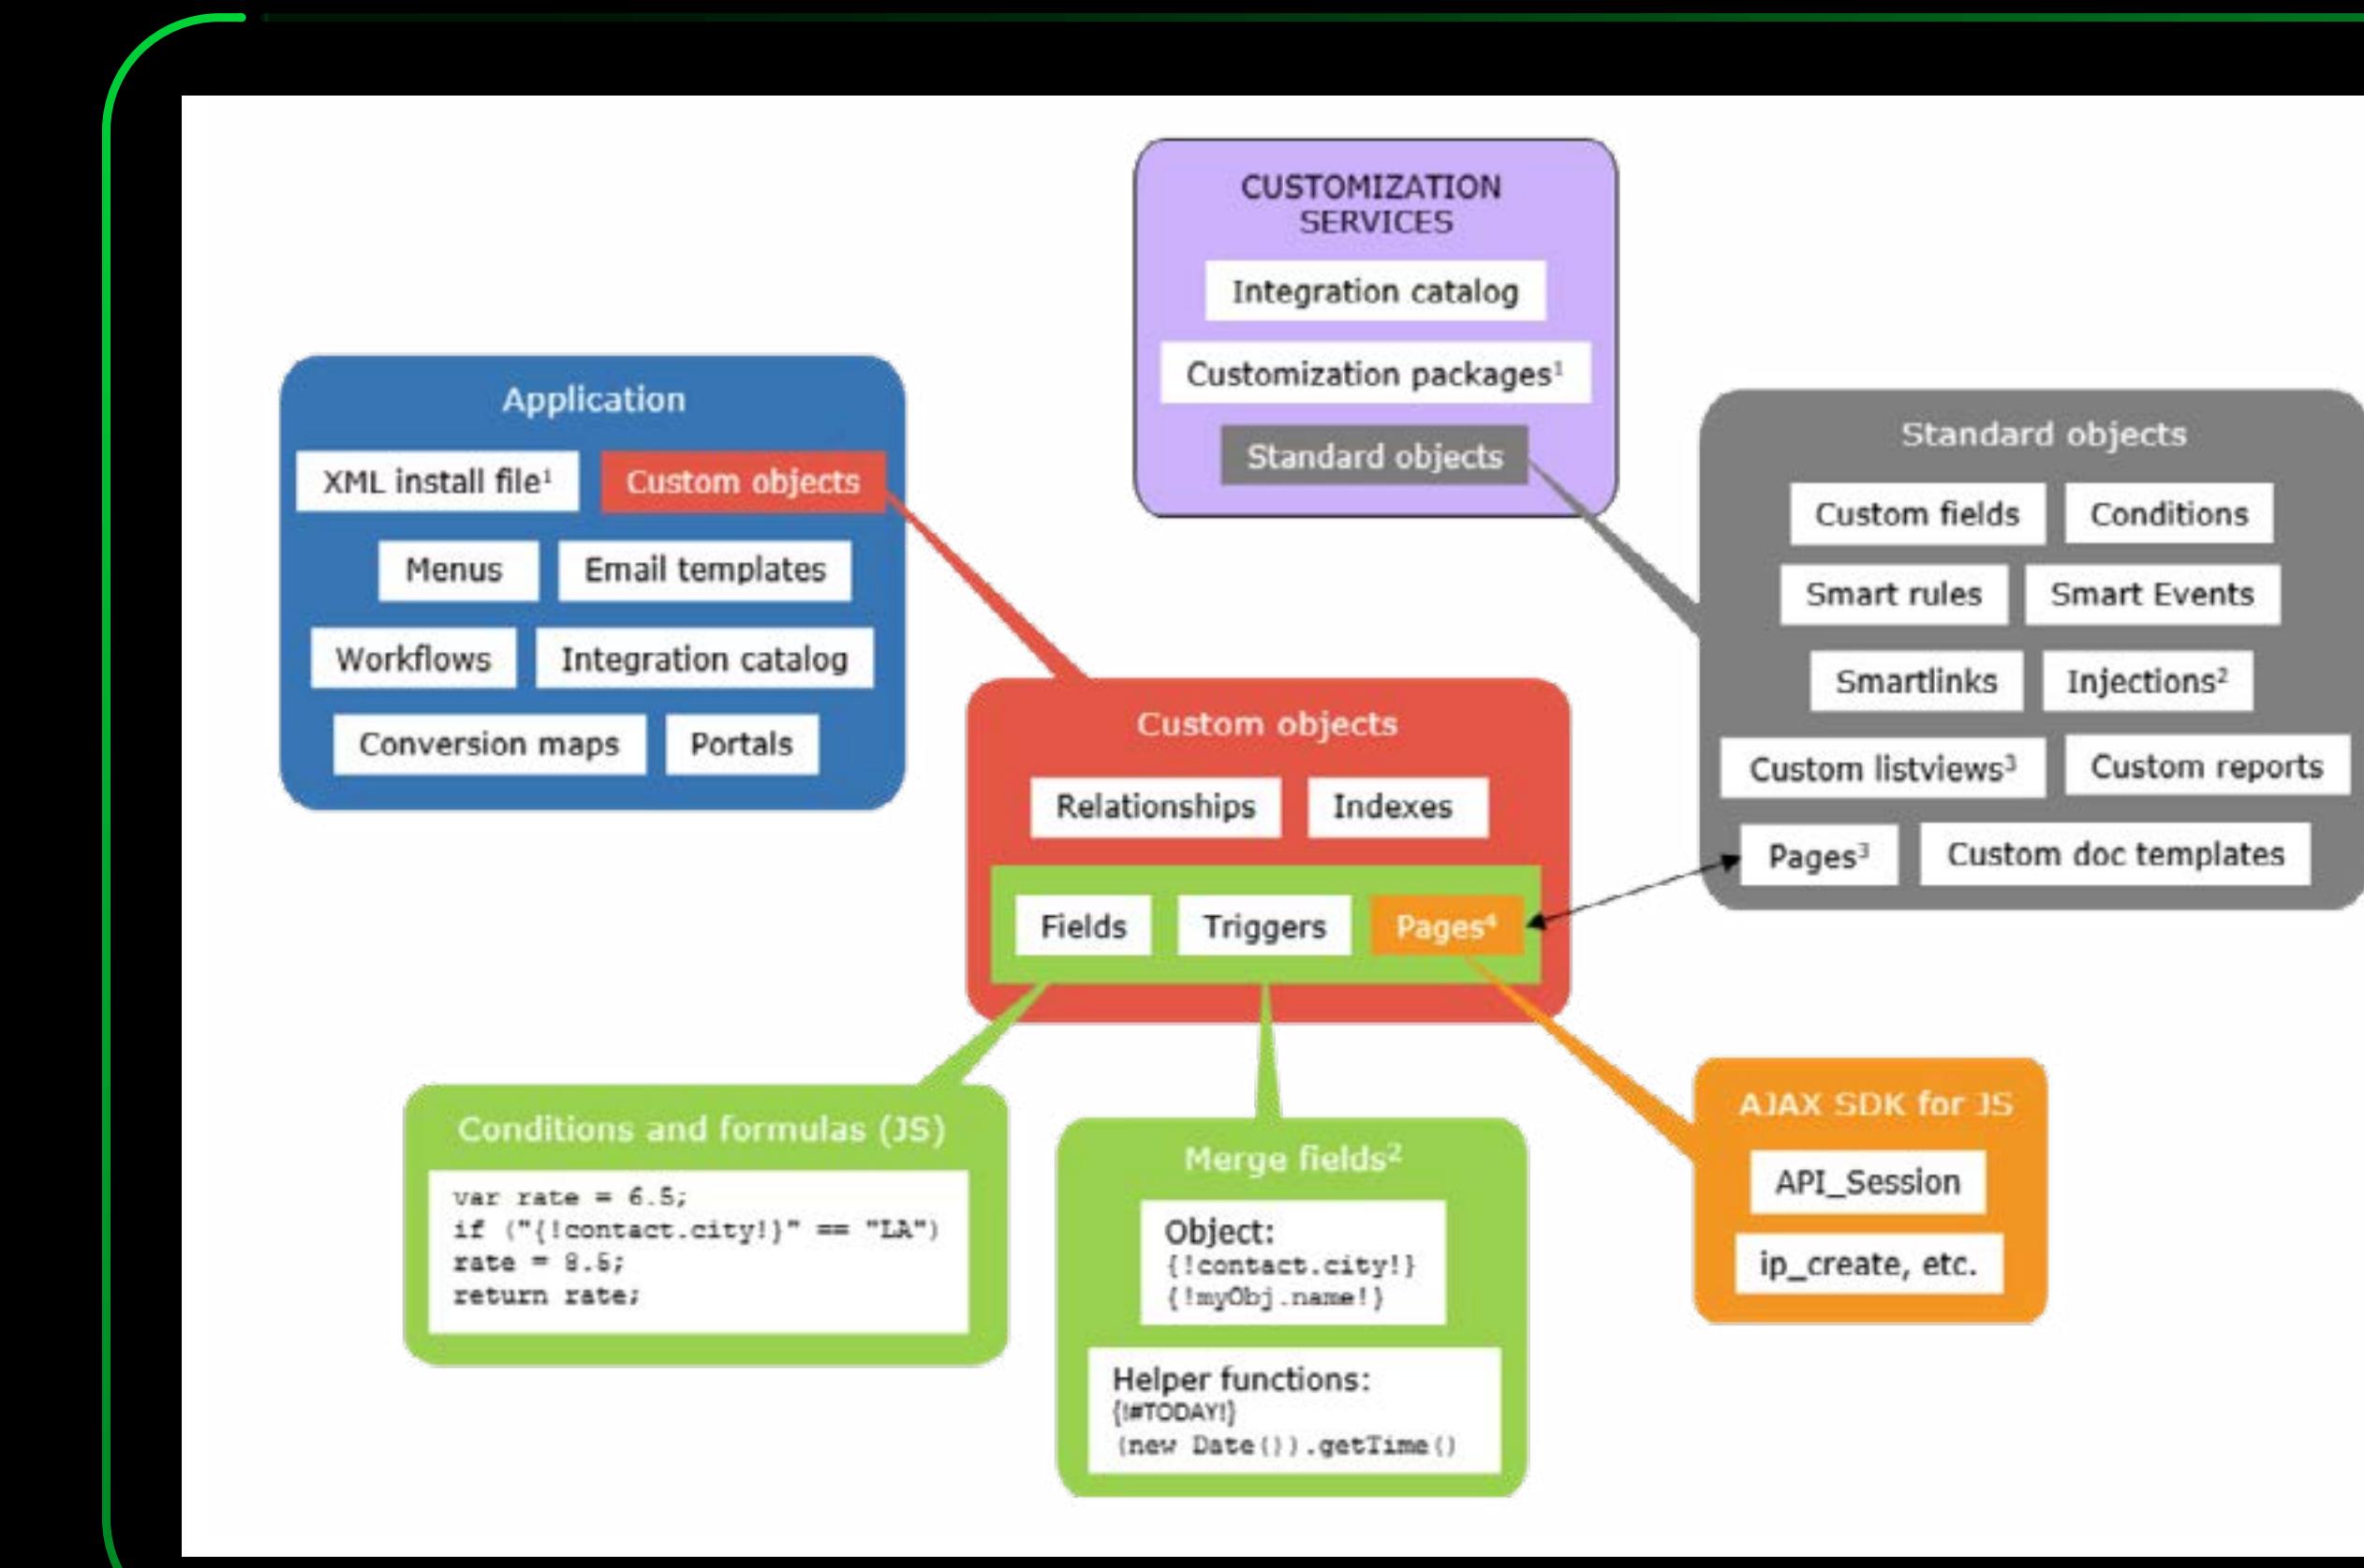

Features advances

Flexible add-on modules for complete financial management

Always be prepared for what the future holds with our customizable modules.

Fixed assets
Thanks to the asset management features, benefit from an automated asset management system.

Inventory management∗
Track, value and manage inventory while ensuring its accuracy at every stage.

Multi-entity and global consolidations
Easily manage complex financial data for multiple sites and entities.

Project accounting
Manage costs and revenues, deliver projects on time and maintain profitability.

Income recognition∗
Consider a wide range of revenue types, from subscriptions to services and licenses.

Expense Management
Always keep an eye on purchases and budgets and never exceed your spending limits again.

Time and expense management∗
Allow your team to focus on customer objectives rather than administrative tasks.

Previews by business sector

Regardless of your industry or business model, your organization is unique. Don't settle for a generic financial management application.

Financial services
Integrate data from different systems, easily monitor financial data across different portfolios, consolidate your results across multiple operating companies, and create actionable and timely reports for your board.

"Sage Intacct allows me to free up the time I need to contribute more to the management committee's decisions. I can focus on analysis for strategic planning purposes instead of just managing tactical financial processes, because the team is now able to handle them without my help. It has taken a huge burden off my shoulders."

— Barbara Harris, Chief Financial Officer, Pathway Lending

Hotel and restaurant industry Focus on your customers with automated financial processes, gain deeper insights into your industry, and make decisions that will boost profitability.

"Sage Intacct is now indispensable to us and is transforming the way we manage our operations. Simply having a real-time overview of data, being able to analyze it automatically and better understand it through artificial intelligence allows us to quickly make the necessary adjustments to continuously improve our profitability."

— Pierre Vandeputte, CEO of Cultures Food
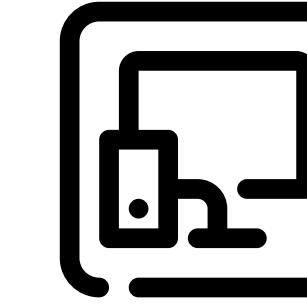

Software publishing
Automate even the most complex financial processes, adapt faster to changes, and provide flexible reporting as your business grows.

"Sage Intacct undoubtedly improves the accuracy and relevance of our subscription billing by allowing us to manage complex contracts and unique pricing models, and our forecasting and analytics are much better. We are on track to cut our billing times in half."

— Sandy Burns, Vice President of Finance, CloudCheckr

Sage

Previews by business sector

Business services
Faced with the quantity and diversity of financial tasks and the need to constantly adapt to clients and the market, having Sage Intacct on your side helps manage volume, variety and change.

"Sage Intacct helps us quickly process thousands of transactions per month and keep pace with the company's growth while minimizing the need for recruitment. Furthermore, now that we have the bandwidth and confidence to do so, our team is motivated to further automate processes, create new customer reports, and much more."

— Sabry Mohideen, Chief Financial Officer, Marathon Ventures

Non-profit organizations Faced with unique challenges such as program and project management, fund balancing, and complex reporting needs, Sage Intacct can help you address them with greater efficiency and managerial visibility, while reducing your reliance on spreadsheets, which are often prone to errors.

"Before, it took me 16 hours per quarter to complete our partial VAT exemption declaration. With Intacct, it now only takes me 8 hours, half the time."

— Karyn Hood, Management Controller and Corporate Secretary, East Malling Trust
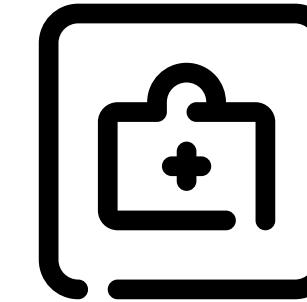

Medical services
In addition to offering a scalable solution that matches your ambitions, Sage Intacct can help you track your performance and ensure the smooth operation of financial processes, especially in multi-site configurations.

"Creating reports with Sage Intacct saves considerable time. There is almost no more manual data entry. We are relieved of daily accounting tasks and can focus on our finances and benefit from better visibility into what is happening in the company."

— Anthony Scaltreto, Financial Analytics Manager, Walden Behavioral Care
