Sage FRP 1000

Inventory

*Freer in your financial management
Sage allows you to demand more from
your accounting and financial management.*

April 2020

Sage FRP 1000 Stocks is part of a complete, integrated, modular and configurable à la carte solution, offering a set of expert features dedicated to financial departments wishing to build their management solution.

An end-to-end inventory management chain

Inventory management is transversal to the accounting and to the sales, purchases and commitment cycles, which allows you to have overall control of your activity.

The creation of reception and delivery circuits is open and intuitive, perfectly adaptable to the organizational context to which it applies. It guarantees the traceability of stocks at all stages of the product's life.

Optimization of all flows related to commercial activity

The functional area dedicated to the commercial activity supports all the management of the articles, the purchase prices allowing to pilot all the processes related to the general expenses and of the investments. Control of the supplier relationship being a key element to guarantee quality and respect of deadlines, the solution also allows you to optimize the management of purchases and to define the circuits adapted to the particularities of each business of the company. A

transverse and integrated vision of the information makes it possible to trace as well as to visualize for each flow, the entirety of the circuit of which it was the object and the detail of the parts which compose it.

Stronger collaboration

The solution offers you a large number of tools to promote collaboration within your company, such as a Web 2.0 financial portal that facilitates communication and information sharing or a workflow engine to manage cross-functional processes and validation. A fully configurable exchange platform allows you to establish file interfaces in real time with your information system.

Thanks to the mobility functions as well as the Microsoft Outlook® and Microsoft Excel® client, you have access to Sage applications for increased collaboration on managing commitments. You thus involve all the employees of your company and meet their needs while offering real ease of use

Complete management

- > stocks and restocking

A decision-maker

- > accessible to all

Fonctionnalités

A solution that reflects your business strategy

Sage FRP 1000 Stocks offers dynamic management of customer and supplier channels. This solution notably allows multi-referencing, the creation of differentiated stock units, the possibility of creating product hierarchies.

General environment

Multi-company, single or multi-base, multi-establishment, multi-currency, multi-third party roles, management of intra-group flows, multilingual management, personalized offices.

Purchasing logistics circuits

Unlimited management of stages, management of short circuits, possibility of assigning a different reception circuit per product, allocation of physical stocks to each stage of the reception circuits, quality control management (management of backorders, returns and pending incidents), wizards for generating purchase documents, generation of single and burst documents, possibility of task planning, conservation and traceability of all purchase documents.

Inventory management

Consultation of inventory operations, services carried out or remaining to be carried out, direct entry of inventories, creation of nomenclatures, management of assembly orders, mass and cascading processing of assembly orders, management of changes in parts in stock: various inputs/outputs, transfer inputs/outputs, compound inputs from assembly orders, valuation of inputs/outputs and inter-depot transfers to the PAMP/CAMP at the end of the day, restitutions: follow-up of input parts lines and stock issues by product, quantities involved, logistics steps, import of assembly orders and miscellaneous operations in stock unit or any other unit, replenishment management.

Decision making within everyone's reach

You have a complete and integrated decision-making environment allowing the implementation of performance indicators, management tools adapted to each user profile for quick access to information essential to their business, a library of dashboards, ready-to-use indicators and reports to facilitate management ownership, publication of reports and indicators through the Web portal or directly from your Microsoft Outlook® messaging system, dashboards accessible from the portal or directly on smartphone or tablet.
