EtiqPro

Labelling & barcode software for Sage 100 and ERP

Centralize and automate your printing, with no third-party software

PPI-Group offers **EtiqPro**, a complete solution to easily design, configure and print your custom labels directly from your **Sage 100** and ERP databases. Free yourself from the constraints of custom label printing: barcodes, QR codes, images, variable text... centralize and automate your printing without wasting time and without third-party software.

Features

1 Key features

- Connection to data sources (Sage 100, SQL databases, CSV files).
- Advanced label creation & customization (text, barcodes, QR codes, images).
- Format management: fonts, borders and colours.
- Direct link between labels and your documents or product records.
- Multi-template compatibility to cover different uses.
- User and access rights management.

2 Key points

- Integrates easily with Sage 100 and SQL ERPs (ODBC connection or export file).
- Flexible editor to customize fonts, images, styles and dynamic fields.
- Multiple template management (data lists, layouts, repetitions per label).
- Intuitive interface with preview, quick copy settings and direct access to data.

3 Installation & quick start

EtiqPro installs easily via a dedicated setup and can be put into service quickly in your Sage or ERP environment.

- Simplified installation of the application
- Licence activation via a dedicated form
- Configuration of the first data sources
- Label printer settings
- Fast deployment on user workstations

Extended technical compatibility

- Sage 100 ERP (proprietary databases, API or connectors).
- SQL databases, ODBC and CSV files.
- Ribbon printers using EPL / ZPL languages.
- Windows and compatible environments.
